What's New in the?

ResophNotes is a simple and easy to use Windows utility that lets you write notes and seamlessly synchronize them across multiple devices using your Simplenote account. There are three main features of the tool: Create, manage and share notes with it. The first part of the tool is a Note List window, which allows you to create, manage and synchronize notes with the Simplenote account. The second part is a note editor window, which lets you create, edit, open, edit again, print and export notes. The last part is a status bar, which shows a word and character counter, time and date of last modification, as well as whether the notes are synchronized. It is possible to share notes with other users, which is done automatically once you click the share button and choose the preferred option. You can also set up a proxy with the help of a pre-installed SIMPLENOTEPORT PROXY. To set up a Simplenote account, you need to enter your email and password. It is then possible to set up a proxy with the help of a pre-installed SIMPLENOTEPORT PROXY.
