UNTOUCHED This review only applies to this item. I am keeping the TRUE review short as I want to say this is a very good game but don't tell me you are single. I understand you may not be with the person or the people you love but if you're alone during xmas and you are wondering if this game is worth it or not? YES!! I will say it's really cool and extremely nice. I find myself playing it more than any other game, anytime the holiday greets roll around. This game is something that everyone should get. My opinion on it, I find it very entertaining. My only problem with it, I can't get a server to log me in. I don't know if it's because of the patch or what but I seem to be having issues with the server so I can't log in sometimes. I've found that the big servers are much better than the little ones. I am currently playing in a big server (it's about 5x bigger than the biggest one I was in for the most part). The way they describe it is that each time you defeat an enemy you gain experience and the experience you gain goes towards your characters level. To make it even better you can combine the different weapons you have equipped into what they call a Rigid. Each Rigid has a different weakness to its element. One of the reasons I like the game is that there is no starting point. The characters you play are in a battle to the death with the Eidolon They can last a very long time as long as you level it up. The combination of how to use your characters is just extremely interesting. The different powers have a large variety of uses. One of the first things I learned about this game is how to negate a power with a quick use of my power ego, ego means I can do all my combo's like that. The game has a platforming mechanic to it. I'm not going to

tell you how to do that, as I just don't know, I play it and I use my instincts. One of the bosses I had was pretty fun to play through as I got power to see into my opponents mind to see where bff6bb2d33
