ArcGIS is available for free with unlimited downloading and updating of maps, and for a low fixed monthly price. Using ArcGIS is an excellent way to learn how to create maps and visualizations, and to learn geospatial data analysis. It also lets users create and share data with the ArcGIS online database. ArcGIS is available in multiple languages. Esri CityEngine is a new Esri location-based modeling tool designed to give you a complete geospatial architecture and design experience by providing direct access to a spatial database of real building and street data. You can use Esri CityEngine to develop projects using the GIS database provided by the product.
